REPUBLIC SPECIAL.

New York, Sept. 3.-This was a day of sensations in the cotton market, the feature of news being the monthly Government crop-condition report, while, as for speculation, the great factor was a feverish demand from demoralized, stunned shorts.

Tremendous speculation was in progress pretty much all day, and from the start the Wall street bulls, who had already scored an advance of nearly 100 points, were jubilant buyers.

The official opening of the market was firm, with prices 3 to 6 points higher on active trading, which was general. Philadelphia, local spot cotton houses and several export firms were seen to be buying September and October contracts; the former interest was believed to be covering old shorts on which large losses have accrued. The South and Europe were vigorous buyers all through the early trading, which was undoubtedly covering, these shorts fearing the purport of the midday Government condition statement.

The Government's report had the effect of causing a violent advance of about 24 points for the various options, or equivalent to \$1.25 per bale from last night's closing

In many quarters the Government's report is believed to be 5 to 10 per cent too low in its estimate of the average condition and is not accepted as accurate. The market closed very firm with prices 22 to 30 points higher than yesterday's final quotation.
